Keyword: Employee Attendance System

Abstraction:

The development of increasingly sophisticated computer that is very helpful in data processing still using manual systems. This often raises issues related to the accuracy of the data which resulted in delays in data processing.

Valuable information is the information quickly and accurately. Then needed a computerized system as a support system of employee absenteeism in PT Andira Sakti using Visual Basic 6.0 programming language designed with the purpose of obtaining and processing information quickly and accurately as well as secure data storage. So, with the end result is useful in making decisions.
